MOD-04 · DEFENCE PROCUREMENT

D-Procure

One platform for the entire defence procurement lifecycle — from RFQ to final delivery, in months instead of years.

// 01 — PROBLEM & SOLUTION

Procurement is long and painful. It doesn't have to be.

The problem

1-2 YEAR CYCLE

- ✕ A long life cycle, taking 1–2 years to complete
- ✕ Multiple parties involved at every step
- ✕ Departments can't see project status at all times
- ✕ Heavy documentation that is hard to manage
- ✕ Tender information is unorganised and hard to find
- ✕ A disconnect between tenderers and the agency

The solution

ONE PLATFORM

- ✓ One view for sales, finance and logistics teams
- ✓ Full lifecycle managed, from RFQ to delivery
- ✓ Documents and communication in one place, email included
- ✓ The whole workflow mapped to the procurement process
- ✓ Tasks auto-assigned across departments, with reminders
- ✓ Automatic grading of bidders' compliance matrices

// 02 — BENEFITS

Track the whole project with one click

PROCUREMENT TIME

~~Years~~ → **Months**

PRODUCTIVITY

+30–40%

Full transparency

Every department sees the same status, in real time.

Paperless

No more printing and passing physical documents.

Digital assets

Products digitised and assets managed in one system.

Fewer errors

Lower error rates and fewer procurement mistakes.

On-time delivery

Fewer delays in delivery and implementation.

One-click tracking

The entire project, visible from a single dashboard.

// 03 — PLATFORM MODULES

Every team, one workflow

Sales & Finance

- Manage customer and vendor orders
- Track orders end to end
- Update invoices and provide financial support
- Share tasks, documents and approvals in one portal
- Optimise procurement and cost

Logistics

- Coordinate with customs and government
- Port of landing, clearance and delivery to end user
- Choose sea or air delivery; update delivery terms
- Mark goods delivered and notify Finance
- Document tracking throughout

Communication & Data

- Reminders and email integration
- Delivery notifications across departments
- Task assignment within the program
- Add, edit and update customer, vendor and product data
